

SUMMARY OF INTERVIEW

The interview was conducted on July 7, 2011 and attended by Examiner Heather Jones and Applicant's representative, David Weiss. Applicant discussed certain clarifying language with respect to Chambers et al. (U.S. Patent Application Publication 2003/0236581), Suzuki et al. (U.S. Patent 6,245,982), and Zimmerman (U.S. Patent 6,411,289). Applicant's representative further discussed certain distinctions of Claim 24 with respect to Kerr (U.S. Patent 7,113,196). Agreement was reached that the proposed clarifications to Claim 21 would require additional search and consideration. Regarding Claim 24, the Examiner indicated that if the language were modified to further clarify that that abstract visual presentation was lit according to the cues taken from the automated lighting system for a live performance, then a further search and consideration would be required as well. The Examiner agreed to contact Applicant's representative if the Examiner determines there is any allowable material.
